Resetting PIN number on the Key Pad Back to 0000:

1) Take the battery out from the Key Pad, Press and Hold 3 and insert the battery back in whilst still holding 3 – the PIN number should be RESET to 0000

SOME QUICK FACTS :
1) Testing the PIN number is working: Press **Panic A** then the **PIN** number – the
green **LED** should **start flashing** continuously (this indicates that the new PIN number has been taken in). After the test **Press DISARM twice** to come out of
the programming mode.
2) **HOME ARM** button not accessible with this system (the same Key Pad is used
as an accessory with the other upgraded system).
3) **PANIC A + PANIC B** – sets the alarm off (**Panic Alarm**)
4) **Battery Not Inserted Properly**: If the Key Pad is not responding (no flashing
light when buttons pressed) – make sure that the battery is inserted properlythere
are two steel strips, make sure that the shorter sits below the battery and the longer above.
